Designing, maintaining, and integrating relational databases with applications.

MySQL, SQL, Data Modeling

Professional Skills

Communication, Teamwork, Problem Solving, Time Management, Adaptability, Critical Thinking, Collaboration

Interests

Research & Reading

Technology trends, self-improvement

Community Service

Volunteering, public service, social impact

Profiles

[joseph-frimpong-484299221](#)

[Frimzy55](#)

Energetic and detail-oriented Computer Science graduate with hands-on experience in software development using Python, Java, React, etc.. Skilled in building efficient and scalable applications, debugging code, and implementing user-friendly solutions. Passionate about developing innovative software that solves real-world problems and continuously enhancing technical expertise.

Experience

Software / IT Intern 2025
Ghana Library Authority koforidua

With hands-on experience in IT systems and software development through an internship at the Ghana Library Authority and National Service Scheme placement. Assisted in maintaining digital library records and databases, developed and updated small software tools to improve library operations, and supported staff with IT troubleshooting and system optimization. Skilled in Python, Java, React, MySQL adjust to your skills, with a passion for building innovative software solutions and continuously enhancing technical expertise. Projects and code samples available on GitHub: <https://github.com/frimzy55>

Front Desk / IT Support 2023-2024
Aburi Presbyterian Hospital Aburi

At Aburi Presbyterian Hospital, I managed patient inquiries and oversaw front desk operations efficiently, ensuring smooth day-to-day administrative functions. I assisted in maintaining digital records and hospital databases, supporting staff with IT troubleshooting and basic system maintenance. Additionally, I provided excellent customer service, helping to create a positive experience for patients while contributing to the effective running of hospital operations.

Education

Bachelor of Technology 2021-2025
Koforidua Technical University
Computer Science
GPA 3.61

Projects

Personalized Nutrition & Meal Planning Platform with integration of local foods 2025

A web application that generates personalized meal plans based on users' health goals and dietary preferences, with React frontend, Node.js/Express backend, and MySQL database.
https://github.com/Frimzy55/meal_planning_git

Gained hands-on experience in fullstack development, database management, and user-centered design, building an interactive and data-driven health application.

Certifications

**National Service Scheme (NSS)
Certificate**
National Service Scheme (NSS), Ghana
2024

Recognized certification showcasing
advanced skills and knowledge in IT
techniques and strategies.

Microcredit Loan Application System 2024

Developed a web application to manage microcredit loan applications, enabling customers to register, apply for loans, and track approvals. Built with React frontend, Node.js/Express backend, and MySQL database for secure data management.
https://github.com/Frimzy55/Yonkopa_micro_credit.git
Gained hands-on experience in fullstack development, database management, and implementing real-world business workflows.
